

Reamer Shoe

Reamer Shoe is designed for downhole applications and is ideally used for well bore condition with severe doglegs, high build rates, and extended horizontal runs. Provide an extra and finished surface for wellbore cementing. Reamer equipped with a Cut-Rite carbide cutting material structure to help eliminate any obstructions. A tapered composite nose is standard with high-port up jet and down-jet nose options to help Jet away filter cake and low side debris in horizontal and deviated well-bores.

Types

- Single Valve Reamer Shoe
- Double Valve Reamer Shoe
- Side Jet, Up-Jet, Down Jet Reamer Shoe

Features

- Design is particularly suited to vertical, horizontal and deviational wells
- Reamer shoes are equipped with a standard enclosed down-jet nose with an aggressive cutting structure.
- All internal parts are PDC drillable
- Compatible with all casing and liner hanger assemblies. Supplied in casing grade as per requirement
