

## Slip On Stand Off Band

Slip on Stand off Band is designed to provide a positive stand off the casing for both cased and open holes. The angled fins provide increased turbulent flow. These Slip on Stand off Band is required where close tolerance between the casing and the hole is being encountered. Mainly it's designed for the liner applications. It's made of one-piece high grade steel which ensures extra strength and superior toughness.

## Features

- Designed for use in vertical & intermediate wells, where positive standoff is required and torque & drag reduction is not an essential requirement.
- Zero starting and running force
- Higher restoring force
- Low friction factor
- Available in Straight and Spiral configuration

## Option

- Right, Left and Straight Vanes are Available or Customised as per request.

*Available size is 4-1/2" to 13-5/8". Any special configuration can be supplied on customer's demand.*
